#### Keep the Children Bright and Happy

Happy youngsters must be healthy. The digestive organs of children get out of order as readily as do those of their readily as do those of their elders, and the result is equally distressing. When the bowels are clogged with an accumulation of refuse from the stomach the child naturally becomes cross and fretful from the discomfort, and is effect numbered for tem-

## RHEUMATISM

#### Physician Believes a Genuine Remedy for the Disease Has Been Found.

Rheuma, the wonderful rheumatism remedy sold by Lee & Osgood and all druggists, gives quicker and more lasting relief than other remedies cost-

ing many times as much. Rheuma gets at once into the blood and purifies it, allowing it to feed freely into the veins and arteries and passes the deadly poisonous secre-tions into the bowels and kidneys

from which they are quickly thrown off in a natural, healthy way.

Read what a reputable physician says about Rheuma: "I have made a most careful investigation of the formula employed in the manufacture of Rheuma, and I heartily recommend it as a remedy for all forms of rheuma-tism, gout, and complications arising from neglect of these diseases in their early stages. On the basis of the formula used alone, I find Rheuma far in advance of the methods gener-ally employed in the treatment of ally employed in the treatment of rheumatism, and altogether different in composition from the remedies usually prescribed.'

should give any sufferer from rheumatism confidence in trying Rheuma. It is so inexpensive you cannot afford to do without it.

This tends to keep the legislative session within the time limit. While blennial elections prevail in Rhode Island, there are annual sessions of the legislature, and public hearings are at the discretion public hearings are at the discretion of the committees. In Connecticut there are biennial elections and biennial sessions of the legislature, and every measure presented is given public hearing and reported either favorably or unfavorably. In Rhode Island many measures are killed and buried in committee. So, as a matter of fact, the amount of business transacted and the biennial against the annual session, the average session of the Connecticut legislature is therefore con-siderably shorter than that of Rhode Island. The number of legislative days in Rhode Island for two years is never less than 120, while in Connecticut the legislative days for the same period

rarely reaches 90 days.

The Rhode Island legislator is the better paid, however, for he receives \$600 in salary during his two years' term of service and a daily mileage of eight cents a mile. The Connecticut legislator receives only \$300 and only one round trip mileage at ten cents a

Miss Mattie P. Babcock of Pawca tuck, who recently returned from a trip to California and the northwest, and who has been for the past few years residing in an uptown hotel in New York city, has just purchased a fine residence in Dobbs Ferry, N. Bail \$500 each. Joseph Holloway, charged with assault, pleaded nolo and sen-tence was deferred with payment of costs. Bail \$190, with Sheriff John R.

The fire department responded to the alarm sent in from the box corner of Granite and John streets, 69, but the fire was beyond the limits of the fire district, in Franklin street, and far removed from the nearest hydrant. How-ever, the firemen with the aid of fire extinguishers helped to save buildings in the vicinity from damage. The fire started in a barn on premises occupied by George A. Williams and owned by Edward Goss. The barn, a carriage shed and blacksmith shop were totally destroyed, with part of the contents that could not be removed, together with 150 chickens which Mr. Williams was raising for market. Mr. Goss beld insurance on the buildings and will sustain no loss. Mr. Williams' loss is estimated at \$200.

The highway that extends direct from Watch Hill to High street, the longest that extends through the com-pact part of the town of Westerly, has five distinct sub-divisions, as to name, and the reason is difficult to explain. Starting from Watch Hill, the first section is known as Watch Hill road; then comes Beach street, then Elm as far as Broad street, then Elm as far as Broad street, then about 100 feet of Granite street, and then it is Grove avenue on to High street. What is termed the fashionable section is known as Elm street, the part that connects with Beach street at one end waterbury after a few days' stay in and Granite street at the other. It is not to be overcome by denying the not to be overcome by denying the existence of trouble, nor by bearing it with grim determination. Philosophy alone is not enough for us. STOCK MARKET SUFFERED A REVERSAL YESTERDAY

Lost Two Points Net in the

Day's Dealings. New York, April 19.—The stock market suffered its first reversal to-day, after an advance, more or less steady, which began in one of almost uninterrupted gains, mainly in the in-vestment division. It was this fact, coupled with persistent "peace" talk which made the rise more impressive

and convincing.

In the last hour, however, a wild spasm to unload was witnessed throughout the entire list, the movement againing force from the cau-tious utterances of the head of the United States Steel Corporation who

stated that democratic trade conditions were far from desirable. Steel, which had been under pressure all day, albeit rising to the high quotations of 60 7-8 suddenly fell back a total of four points and other leaders declined in greater or less pro-portion. Some gains were entirely wiped out Steel losing net and others relinquishing the greater part of their rise. In the final dealings the reaction was slightly arrested, but the closing indicated a revival of offerings in which the bear party was a formida-

ble factor. The day's business which amounted to almost 1,500,000 shares, thereby making a record for activity since September, 1911, began with advances in all quarters of the list, except the motor shares and some of the equip-ments and industrials which figured in last week's sensational rise. Almost the only specialties to show strength were the petroleums and American
